

Economic Growth Region 10

Statistical Data Report for March 2016, Released May 2016

Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were little changed in March. Twenty-one states had unemployment rate decreases from February, 15 states had increases, and 14 states and the District of Columbia had no change, the U.S. Bureau of Labor Statistics reported. Thirty-six states and the District of Columbia had unemployment rate decreases from a year earlier, 12 states had increases, and 2 states had no change. The national jobless rate, 5.0 percent, was little changed from February and was 0.5 percentage point lower than in March 2015.

In March, no region had an unemployment rate significantly different from the U.S. rate of 5.0 percent. Over the month, no region had a statistically significant unemployment rate change. Significant over-the-year rate changes occurred in three regions: the Northeast and West (-0.9 percentage point each) and South (-0.6 point).

Economic Growth Region (EGR) 10

Clark, Crawford, Floyd, Harrison, Scott, and Washington Counties.

March 2016 Labor Force Estimates (not seasonally adjusted)

Area	Labor Force	Employed	Unemployed	Mar 2016 Rate	Feb 2016 Rate	Mar 2015 Rate

Employment by industry, 1910 and 2015

The Editors Desk, The Bureau of Labor Statistics March 2016

The life of American workers in 1915 discusses population, labor force, job, and wage characteristics, as well as the food workers ate, the homes they lived in, and how they traveled to work a century ago. It is one of several articles marking the 100th anniversary of the Monthly Labor Review.

Nonfarm employment, by major industry, 1910 and 2015, using 1910 industry classifications

Percent of total employment

Click legend items to change data display. Hover over chart to view data.
Source: U.S. Bureau of Labor Statistics.

Comprehensive data by industry do not exist for 1915, but we have information for 1910 from the decennial census. Data from the 1910 Census show that 32 percent of nonfarm jobs were in manufacturing; in 2015, manufacturing accounted for less than 9 percent of total nonfarm employment. The number of people employed in manufacturing was 8 million in 1910 and 12 million in 2015. While employment in manufacturing grew over the past 100 years, employment in other industries grew more. Transportation and public utilities also declined in percentage terms over the last century, from 13 percent in 1910 to 4 percent in 2015. The number of people employed in transportation and public utilities was 3 million in 1910 and 6 million in 2015. From 1910 to 2015, employment in mining and the percentage of total employment in mining both decreased. In 1910 there were 1 million people employed in mining, accounting for 4 percent of nonfarm employment; in 2015, the number employed was 25 percent lower than in 1910 and less than 1 percent of total 2015 employment. Domestic service, such as maids and cooks in private households, accounted for about 9 percent of nonfarm employment in 1915; comparable data for recent years are not available. Employment in wholesale and retail trade, including eating and drinking places, increased from 3 million (or 13 percent of nonfarm employment) in 1910 to 33 million (23 percent) in 2015.
