

Labor Market Review

Statistical data report for June 2010, Released July 2010

Economic Growth Region 11

Regional and State Unemployment (seasonally adjusted)

The U.S. Bureau of Labor Statistics reported that regional and state unemployment rates were generally lower in June. Thirty-nine states and the District of Columbia recorded unemployment rate decreases, five states had increases and six states had no change. Twenty-four states recorded unemployment rate increases from a year earlier, 22 states and the District of Columbia had decreases, and four states had no change.

Nevada again reported the highest unemployment rate among the states, 14.2 percent in June. The rate in Nevada also set a new series high. All region, division, and state series began in 1976. The states with the next highest rates were Michigan, 13.2 percent; California 12.3 percent; and Rhode Island, 12.0 percent. North Dakota continued to register the lowest jobless rate, 3.6 percent, followed by South Dakota and Nebraska, 4.5 and 4.8 percent, respectively. In total, 25 states posted jobless rates significantly lower than the U.S. figure of 9.5 percent, 10 states had measurably higher rates, and 15 states and the District of Columbia had rates that were not appreciably different from that of the nation.

Economic Growth Region (EGR) 11 includes Dubois, Gibson, Knox, Perry, Pike, Posey, Spencer, Vanderburgh and Warrick Counties.

College Enrollment and Work Activity of 2009 High School Graduates

The U.S. Bureau of Labor Statistics reported that, in October 2009, 70.1 percent of 2009 high school graduates were enrolled in colleges or universities. This was a historical high for the series, which began in 1959. Recent high school graduates not enrolled in college in October 2009 were more likely than enrolled graduates to be in the labor force (70.0 compared with 42.1 percent).

Information on school enrollment and work activity is collected monthly in the Current Population Survey (CPS), a nationwide survey of about 60,000 households that provides information on employment and unemployment. Each October, a supplement to the CPS gathers more detailed information on full-time and part-time school enrollment status, level of education, and enrollment status a year earlier. Additional information about the October supplement is included in the Technical Notes.

Of the 2.9 million youth age 16 to 24 who graduated from high school in January through October 2009, 2.1 million (70.1 percent) were enrolled in college in October 2009. The college enrollment rate of recent high school graduates has been trending up; in October 2008, 68.6 percent of recent high school graduates were enrolled in college. For 2009 graduates, the college enrollment rate was 73.8 percent for young women and 66.0 percent for young men. The college enrollment rate of 2009 Asian graduates (92.2 percent) was higher than for recent white (69.2 percent), black (68.7 percent), and Hispanic (59.3 percent) graduates.
