

Economic Growth Region 2

Statistical Data Report for June 2013, Released August 2013

Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were little changed in June. Twenty-eight states had unemployment rate increases, 11 states had decreases, and 11 states and the District of Columbia had no change, the U.S. Bureau of Labor Statistics reported. Thirty-seven states and the District of Columbia had unemployment rate decreases from a year earlier, seven states had increases, and six states had no change. The national jobless rate was unchanged from May at 7.6 percent but was 0.6 percentage point lower than in June 2012.

Economic Growth Region 2 (EGR2)

Elkhart, Fulton, Kosciusko, Marshall and St. Joseph Counties.

June 2013 Labor Force Estimates (not seasonally adjusted)						
Area	Labor Force	Employed	Unemployed	June 2013 Rate	May 2013 Rate	June 2012 Rate
U.S.	157,089,000	144,841,000	12,248,000	7.8%	7.3%	8.4%
IN	3,202,296	2,924,911	277,385	8.7%	8.1%	8.5%

Employee Benefits in the United States: March 2013

(Excerpted from the Bureau of Labor Statistics report released July, 2013)

Employer-provided medical care was available to 85 percent of full-time private industry workers in the U.S. in March 2013, the U.S. Bureau of Labor Statistics reported recently. By contrast, only 24 percent of part-time workers had medical care benefits available. Access, or availability, also varied by employment size: 57 percent for all workers in small establishments (fewer than 100 employees), compared with 85 percent in medium and large establishments (100 employees or more).

Retirement benefits followed a similar pattern as medical care benefits. In private industry, 74 percent of full-time workers had access to a retirement plan, significantly higher than 37 percent of part-time workers. Retirement benefits were available to 49 percent of workers in small establishments and 82 percent of workers in medium and large establishments.

Paid sick leave benefits were also more commonly offered to full-time workers and those in medium and large establishments in private industry. Plans were offered to 74 percent of full-time workers and 24 percent of part-time workers. Similarly, 51 percent of workers in small establishments and 72 percent in medium and large establishments had access to a paid sick leave benefit.

These data are from the National Compensation Survey (NCS) which provides comprehensive measures of compensation cost trends and incidence and provisions of employee benefit plans. Additional findings include:

- In private industry, 64 percent of employees had access to retirement benefits, significantly less than the 89 percent of state and local government employees with access. Additionally, only 49 percent of private industry employees actually participated in a retirement plan (had current coverage), significantly less than the 85 percent participation rate of state and local government employees.

- Access and participation in life insurance benefits varied significantly for full-time and part-time workers. In private industry, 72 percent of full-time workers had access to life insurance benefits. For state and local government workers, 90 percent of full-time workers had access. In contrast, only 14 percent of part-time workers in private industry and 23 percent of state and local government workers had access. Most workers who had access participated in life insurance benefits.

- Paid holidays were available to 97 percent of management, business, and financial employees in private industry. In contrast, only 53 percent of service employees in private industry were provided paid holidays.
