

Economic Growth Region 4

Statistical Data Report for June 2016, Released August 2016

Regional and State Unemployment (seasonally adjusted)

Unemployment rates were significantly higher in June in six states, lower in one state, and stable in 43 states and the District of Columbia, the U.S. Bureau of Labor Statistics reported. Sixteen states and the District had notable unemployment rate decreases from a year earlier, two states had increases, and 32 states had no significant change. The national jobless rate rose by 0.2 percentage point from May to 4.9 percent but was 0.4 point lower than in June 2015.

In June, no region had an unemployment rate significantly different from the U.S. rate of 4.9 percent. Over the month, the West had the only statistically significant unemployment rate change (+0.1 percentage point). Significant over-the-year rate decreases occurred in three regions: the South and West (-0.6 percentage point each) and Northeast (-0.5 point).

Economic Growth Region (EGR) 4

Benton, Carroll, Cass, Clinton, Fountain, Howard, Miami, Montgomery, Tippecanoe, Tipton, Warren and White Counties.

TED: The Economics Daily

Number of people working part time for economic reasons falls in June 2016

July 12, 2016

The number of people working part time for economic reasons (sometimes referred to as involuntary part-time workers) decreased by 587,000 to 5.8 million in June 2016, offsetting an increase in May. These workers would have preferred full-time employment but were working part time because their hours had been cut or because they could not find a full-time job.

The number of involuntary part-time workers in June was 3.4 million lower than the most recent peak in September 2010. Despite the decline, there were still about 1.4 million more involuntary part-time workers in June 2016 than in the months just before the start of the 2007–09 recession.

There were 20.5 million people in June 2016 who worked part time for noneconomic reasons. These people worked part time because of school or training, family or personal obligations, or other reasons.

These data are from the Current Population Survey. For more information, see “The Employment Situation — June 2016”. For more charts, see Graphics for Economic News Releases: The Employment Situation. Part-time workers are people who worked fewer than 35 hours during the survey reference week.

Bureau of Labor Statistics, U.S. Department of Labor, *The Economics Daily*, Number of people working part time for economic reasons falls in June 2016 on the Internet at <http://www.bls.gov/opub/ted/2016/number-of-people-working-part-time-for-economic-reasons-falls-in-june-2016.htm> (visited July 13, 2016).
