

Economic Growth Region 5

Statistical Data Report for May 2016, Released July 2016

Regional and State Unemployment (seasonally adjusted)

Unemployment rates were significantly higher in May in five states, lower in four states and the District of Columbia, and stable in 41 states, the U.S. Bureau of Labor Statistics reported. Sixteen states and the District had notable unemployment rate decreases from a year earlier, two states had increases, and 32 states had no significant change. The national jobless rate declined by 0.3 percentage point from April to 4.7 percent and was 0.8 point lower than in May 2015.

In May, the only region with an unemployment rate significantly different from that of the U.S. was the West at 5.1 percent. Over the month, the South had the only statistically significant unemployment rate change (-0.1 percentage point). Significant over-the-year rate decreases occurred in three regions: the West (-0.8 percentage point), Northeast (-0.6 point), and South (-0.5 point).

Economic Growth Region (EGR) 5

Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, and Shelby Counties.

Retail Sales

Sales at U.S. retailers rose a solid 0.5% in May after an even larger gain in the prior month, suggesting consumers still feel confident enough in the economy to stick to their usual spending patterns despite a slowdown in hiring. The sales gains were widespread. Auto dealers, Internet retailers, clothing outlets, gas stations, sporting-goods stores and restaurants all saw a healthy uptick in sales. (Daily Labor Report)

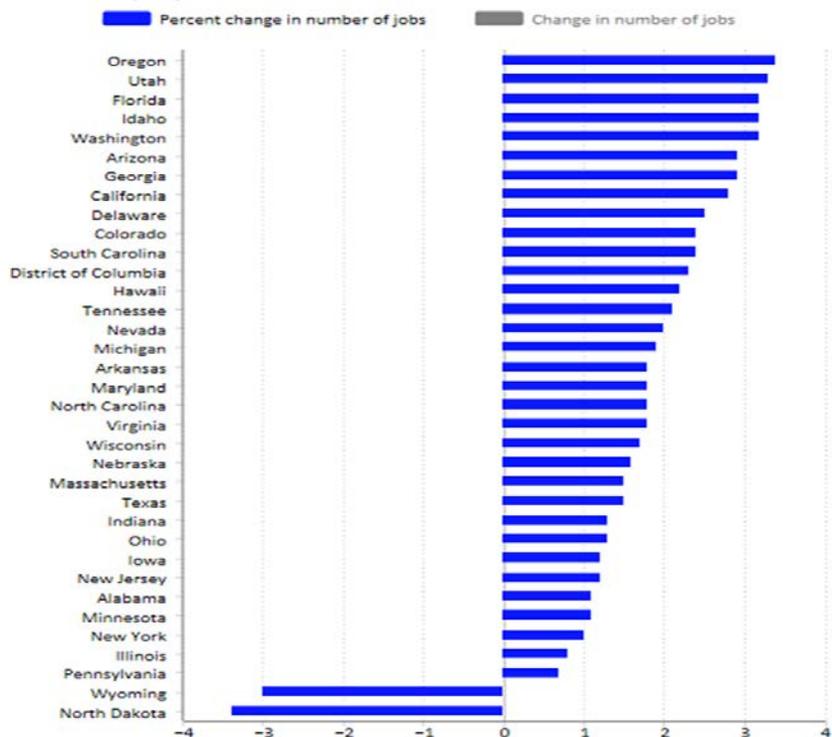

Average Weekly Earnings

The average worker's weekly earnings fell in May for a third straight month after adjustment for inflation, suggesting slow wage growth is not keeping up with increases in the cost of living, data from the Labor Department showed. The 0.1 percent loss for private-sector production and nonsupervisory employees followed a 0.2 percent decrease in each of the two prior months. May's decline in real earnings reflected a 0.2 percent jump in the consumer price index for urban wage earners and clerical workers. (Daily Labor Report)

States With Significant Employment Changes, May 2015 to May, 2016

Thirty-two states and the District of Columbia had statistically significant increases in nonfarm employment from May 2015 to May 2016. The largest percentage gains were in Oregon (3.4 percent) and Utah (3.3 percent), followed by Florida, Idaho, and Washington (3.2 percent each). The largest job gains occurred in California (440,300), Florida (253,900), and Texas (171,800). (The Economics Daily)

States with statistically significant employment changes from May 2015 to May 2016, seasonally adjusted
