Methodology Notes

Claimant Analysis Scope = Unique Claimants Who Meet the Following Criteria:

Filed a continued claim for compensable weeks ending in 2019Q4 (regardless of payment status)

Filed an initial claim in 2019Q4 (regardless of claim status)

Transaction types of 'RG' (regular) and 'RV' (released vouchers) included.

Grand totals on each page excludes claimants from other states.

All claims types are included in the calculations in this report.

Additional Notes on "Weeks Paid and Average Weekly Payment" page:

Other analyses include all claimants, regardless of payment status, so these counts may be smaller.

Differences between entitlement amounts and proceeds amounts reflect amounts deducted for taxes, child support payments and/or employment payment amounts for vacation, holidays, etc.

Entitlement amounts are based on employees' wages during the benefit determination period.

Proceeds amounts are the actual dollar amounts of the checks that go out to claimants.

The City of Residence, County of Residence, and County of Employer pages only show the top 25 values. The remainder of the values are placed into an "Other" grouping.

Claims data extracted from the Workforce Warehouse database, designed primarily as a research database, may not match exactly other counts produced by or for the Employment & Training Administration of the U. S. Department of Labor.

Suppression:

*Data is non-disclosable in this cell due to primary suppression. If a value is less than 10 claimants, but greater than zero, the data is suppressed.

**Data is non-disclosable in this cell due to secondary suppression. In this case, if the value of a non-disclosable data cell can be determined by adding disclosed data and subtracting from the total, the 2nd smallest value is also suppressed.

Glossary of Terms

NAICS = Industry Codes. The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy.

SOC = Occupational Codes. The Standard Occupational Classification (SOC) system is used by Federal statistical agencies to classify workers into occupational categories for the purpose of collecting, calculating, or disseminating data. All workers are classified into one of 840 detailed occupations according to their occupational definition.
