

Welcome to Economic Growth Region 9 Highlights

2005 Edition

*Highlights of Economic Growth Region 9 is a labor market information publication of the Indiana Department of Workforce Development.

This publication is provided annually for each of Indiana's 92 counties, 11 Economic Growth Regions and the State of Indiana.

Each publication includes a variety of demographic information: population, labor force estimates, industry employment, industry annual average wages, and firms and employment by size and by industry.

If you need further information about your area, you may call the regional analyst listed below. If you need labor market information for other areas, you will find a map of the regional analysts at the back of this publication and posted on our Internet website under *Resources*.

Additional labor market information is available on our Internet website.

Our website address is <http://www.state.in.us/dwd/inews>

SUMMARY OF ECONOMIC GROWTH REGION 9 HIGHLIGHTS

Region 9's population estimate for 2004 was 314,768, up 2.5 percent from the 2000 Census total. During this same time period, Indiana's total 2004 estimated population of 6,237,569 was up by 2.6 percent.

According to the 2000 Census 159,725 people twenty-five years of age or over were high school graduates and/or had post-high school education. That represented 80.2 percent of the twenty-five and up regional population. Of that population, 29,380 or 14.8 percent were four year college graduates or greater. In 2004, of the 3,033 persons graduating high school that year, 2,278 or 75.1 percent intended to go on to higher education.

A total of 36,304 workers or 18.9 percent of the workforce commuted into the region in 2003. Scott County was sending the most workers into Region 9. Conversely, 50,473 or 24.5 percent of the labor force commuted to work outside of the region. Region 9 received the most workers from the state of Ohio.

The estimated average unemployment rate for 2004 was 4.9 percent, below Indiana's annual average of 5.2 percent. The region's unemployment rate was based on an estimated average residential labor force of 163,090. Of that labor force 155,080 were employed and 8,010 were unemployed.

For the year 2004 there were 131,674 jobs at industries within the region. The largest employing industry in the region was manufacturing with 28.4 percent of the total industry employment and trade, transportation & utilities second at 18.0 percent. The industry showing the most growth in workers over a three year period (since 2001) was educational services increasing by 792 workers or 9.7 percent above 2001. 13.3 percent of employers in the region employed 20 or more workers and those represented 77.1 percent of all employment.

The all industry average 2004 earnings for the region was \$32,467 per year versus Indiana's \$34,693. The regional average wage was an increase of 9.5 percent over the 2001 regional industry average wage. Only 1 of Region 9's 11 industry supersectors (including government) had annual average earnings greater than the Indiana average for those industries. The region's manufacturing industry had the highest average earnings at \$44,049 per year, with financial activities second at \$39,159, while the industry with the lowest annual earnings number was leisure and hospitality services at \$16,667. The same industries statewide paid an average \$47,643 \$43,206, and \$13,913 per year, respectively.

POPULATION

REGION 9 AND CITY POPULATION

TECHNICAL NOTES

For over sixty years, industry information has been compiled using the Standard Industrial Classification (SIC) system. Since 1993, the industry data tables in this publication were classified by SIC.

Beginning with the 2002 issue of the Highlights report, new industry data tables are based upon the North American Industry Classification System (NAICS).

Developed jointly by the United States, Canada and Mexico to produce comparable data, NAICS was introduced in 1997 to replace the SIC system. Because of its' scope and complexity, the transition to NAICS has taken three years to complete and is now effective beginning with 2001.

NAICS provides a more specific classification system reflecting the economy's changing industrial composition. NAICS focuses on *how* products and services are created, as opposed to the SIC focus on *what* is produced.

This reorganization has created breaks in the industrial classification time series. Even though, for example, the Manufacturing industry group is still listed, the current statistical data for Manufacturing may not be comparable to what was previously shown.

Example: An industrial machine company has its employment offices in a separate building. Those workers may now be listed in the Professional and Business Services industry under NAICS, rather than in Manufacturing. The same is possible for other industries.

NAICS uses a six digit hierarchical coding system to classify all economic activity. NAICS-United States allows for the identification of 1,170 industries compared to the 1,004 found in the SIC system. NAICS classifications are reviewed every three years. For purposes of this publication we will be classifying economic activities into 11 NAICS 'super sectors' and 15 NAICS sectors.

* * * * *

The following is a listing of the NAICS 'super sectors' we will be using:

Natural Resources & Mining includes agriculture, forestry, fishing, hunting, and mining.

Construction

Manufacturing

Trade, Transportation & Utilities includes wholesale and retail trade, utilities, transportation, and warehousing.

Information includes publishing, motion pictures, sound recording, broadcasting, Internet publishing, telecommunications, ISPs, search portals, data processing, news syndicates, libraries, and archives.

Financial Activities includes finance, insurance, real estate, and rental and leasing.

Professional & Business Services includes professional, scientific, and technical services, management of companies and enterprises, administrative/support, and waste management and remediation services.

Education & Health Services includes educational and health services, health care, and social assistance.

Leisure & Hospitality includes arts, entertainment, recreation, accommodation, and food services.

Other Services includes repair, maintenance, personal, laundry services and religious, grant making, civic, social, and professional organizations and private households.

Federal, State & Local Government includes total government employment.
