Research & Analysis

IDWD is working hard to ensure Indiana employers have a competitive and flexible workforce. We do this by providing Hoosiers with opportunities and support to grow their knowledge and skills for sustainable employment in this global economy.

To help fulfill this mission, IDWD provides extensive data and metrics on the available labor force, occupational projections, demographics, industry trends, salary information, and unemployment statistics. We are now making more and more of this information available on the web and in easy-to-use and download formats. The website will undergo continuous enhancements, include GIS mapping during the summer of 2006.

We appreciate your feedback. Your opinion counts.
