### **A Labor Market Information publication of the Indiana Department of Workforce Development**

This publication is provided annually for each of Indiana's Metropolitan Statistical Areas (MSA), Economic Growth Regions (EGR) and the State of Indiana.

The OCCUPATIONAL EMPLOYMENT AND WAGE STATISTICS (OEWS) survey has been collecting occupational employment data for over 20 years. This survey is a cooperative effort between the Indiana Department of Workforce Development and the U.S. Bureau of Labor Statistics. The OEWS program produces employment and wage estimates for over 800 detailed occupations. These are estimates of the number of people employed in certain occupations, and estimates of the wages paid to them. These estimates are available for the nation as a whole, for individual states, and for metropolitan statistical areas (MSA's). Estimates from the OEWS are based on data collected using the Standard Occupational Classification (SOC) system.

The survey is a three-year long project, collecting one-third of the sample each year. The full 3-year sample allows the production of estimates at fine levels of geographic, industrial, and occupational detail. Beginning with May 2023 estimates and survey data are based on the 2022 NAICS. Earlier panel data and estimates were based on the 2002 NAICS. For more information about NAICS, see the BLS web site at <http://www.bls.gov/bls/naics.htm>.

**The OEWS program produces estimates of wages by occupation.** These occupational wage estimates are either estimates of mean wages or percentiles, such as the median wage. Wages for the OEWS survey are straight-time, gross pay, exclusive of premium pay. Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

>A **mean** wage is an average wage. An occupational mean wage estimate is calculated by summing the wages of all the employees in a given occupation and then dividing the total wages by the number of employees.

>A **median** wage is a boundary. An occupational median wage estimate is the boundary between the highest paid 50% and the lowest paid 50% of workers in that occupation. Half of the workers in a given occupation earn more than the median wage, and half the workers earn less than the median wage.

>A **percentile** wage shows the percentage of workers in an occupation that earn less than a given wage and the percentage that earn more. For example the 25th percentile means that 25% of employees earn less than the estimated annual wage, while the remaining 75% would earn more.

**The construction wages listed do not reflect "common" or "prevailing" wages for government contract purposes. For "common" wage data, please contact Indiana Dept. of Labor, Wage & Hour Division at (317) 234-4681 or (317) 232-2655.**

The response to this survey is voluntary. We would like to thank those employers who volunteered their time to complete the questionnaire. If you are an employer and receive an OCCUPATIONAL EMPLOYMENT AND WAGE STATISTICS survey questionnaire, your participation is encouraged and appreciated by all those who use this data for their activities.

If you need further information about your area or if you need labor market information for other areas, you will find a list of the local labor market analysts posted on our Internet website [hoosierdata.in.gov](http://hoosierdata.in.gov) under *Contact*.
